

Thread Milling Cutters

WX-ST-PNC-3P

Metric, Metric fine, G(as)

WX-ST-PNC-3P Thread Milling cutters

1 Due to use of high-hardness materials exceeding 50HRC, heat resistant steel, and even brittle materials, small-diameter internal threads are becoming increasingly difficult to machine.

2 Along with the need for ultra-high speed and high precision operations, small machining centers without reverse function (tap cycles) have emerged.

3 The demands for internal threads are becoming increasingly difficult, such as “no room in pilot holes”, “high quality with no burrs”, and “high precision internal threads”.

4 Standard taps have difficulties machining nickel based alloys with water-soluble coolant.

WX-ST-PNC-3P

The 3-crest thread length reduces cutting forces and applies a low load to the tool and equipment. A short overall length of 40mm for superb ease of use. The WXS Coating, with a proven track record on end mills for high hardened materials, and an exclusive carbide base material.
