Health System Frontline Reports and Tips - Coronavirus

Share your information about how coronavirus is affecting your organization:

- IT priorities.
- IT lessons learned.
- IT tips for other health systems.
- New technologies or existing systems being used new ways.
- Managing IT and related teams under current and expected conditions.
- Anything important your organization has learned, including system-wide and clinical decisions.

Your experience and expertise can help another health system and vice versa. Time is short.

General description for your health system (optional, but size and geography helps readers determine relevance)

Your reports and tips *
